The diagram illustrates a transformation between two matrix representations of workflows. A curved arrow labeled "3800" points from the left towards the matrices. The top matrix, labeled "3802", has "Row-Index (i)" on its left and "Column-Index (j)" at the top. It contains elements m_{ij} for $i \in \{1, \dots, m\}$ and $j \in \{1, \dots, m+n\}$. The bottom matrix, labeled "3806", has "Row-Index (i)" on its left and "Column-Index (j)" at the top. It contains elements n_{ij} for $i \in \{1, \dots, m+n\}$ and $j \in \{1, \dots, n\}$. The matrices are separated by a vertical line. A curved arrow labeled "3804" points from the right towards the bottom matrix.
